

STIRLING LX MK2

With its fully automated electric roof system that makes opening the camper quick and easy, extra storage boxes for poles and camping equipment, and easy-to-clean bamboo floor, the Stirling LX MK2 forward folding camper trailer is one of the most versatile and durable campers on the market today.

Stirling LX MK2 forward fold camper trailers feature a main tent and awning made from high-quality 450gsm poly-cotton fine weave canvas, and for added durability, all stress points have been double stitched. The Stirling LX MK2 forward folding camper trailer additionally boasts windows that are screened with fibreglass midge meshing, specially designed to keep mosquitoes and any other unwanted insects at bay. Its canvas tropical roof also helps to keep the camper cool while providing an added layer of protection.
